PROFILE

Enthusiastic and results-driven Engineering student at MGM University (Class of 2026) with a solid foundation in web development and a growing expertise in software engineering. Passionate about creating intuitive and dynamic web applications, I have honed my skills through hands-on projects and internships. My experience includes developing user-friendly websites, optimizing web performance, and implementing responsive design principles. Known for my collaborative approach, problem-solving abilities, and eagerness to learn, I am excited to contribute to innovative web development teams and build impactful digital solutions.

PROJECTS

Pinterest Clone : built with HTML, CSS and JavaScript, for the front end, and Node.js, Express.js, and MongoDB for the back end.

Zomato Backend API : Using Node.js and SQL, implementing RESTful APIs for user authentication, restaurant management, and order processing.

Udify : Developed a comprehensive academic resource website offering notes, practical, and previous year questions for all college years, using HTML, Tailwind CSS, JavaScript, PHP, and SQL.

Achievements

Won first place at the SGGGS Nanded Hack It Hackathon.

Selected for the regional bootcamp at the international-level Google Solution Challenge.

Selected for round two at Google Hack 4 Change, a national-level hackathon

Served as a Campus Ambassador for LetsUpgrade, enhancing team management skills and promoting a community of over 1 million developers.
